# **SOUTH AFRICA'S MOST TRUSTED**

**Insect & Security Screens**

WHAT MAKES US DIFFERENT?

# ABOUT US

CORNER STAR SA offers a range of Insect Screens & Secure Screens for all types of windows, doors & patios.

---

We believe that our Insect Screens and Secure Screens are the most versatile and durable products of its kind in the country. It has been developed since 1999 and has fast become a favourite in homes, hospitals, farms and game lodges.

### **The Patented Corners**

The patented corner system used in the Corner Star Insect Screen and Secure Screen is an important part of the durability and versatility of the product. It is the only system of its kind.

The Corner Star mosquito screens allow for its mesh to be replaced without compromising the product.

### **The Mesh**

The mesh is imported from the United States, specifically designed for high temperatures. Our Insect Screen mesh is made from interwoven fibre glass and coated with PVC. Our Secure Screen mesh is black powdercoated SS316 Marine Grade Stainless Steel.

This ensures that the finished product is strong and that it won't corrode with time and is suitable for all climates and weather.

### **Aluminium Extrusions**

Aluminium is durable and corrosion resistant. Our Aluminium profiles are naturally anodised or powercoated making them last longer. Aluminium is very suitable material for coastal living. Aluminium is lightweight and with our clip-on-system on Insect Screens, they are light and easy to remove for cleaning purposes. Our Secure Screens profiles are the most rigid Security Screens extrusions in South Africa.
